Summary

Enthaustic and Dedicated Flutter Developer with strong foundation in dart programming language. Eager To apply my knowledge of building engaging user interfaces and integrating third party library to contribute to innovative mobile app projects. Proven ability to work effectively in a team environment and passion for staying update with latest trends in mobile development. Seeking internship opportunity to further develop my skills and make vital contribution to real world.

Experience

Although I don't have professional experience as flutter developer. I have gained valuable knowledge and skills through my course work and projects. I have completed several mobile app development projects using flutter and dart showing my ability to create user interface and integrate functionality. My dedication to learning and applying new technology makes me well prepared to contribute effectively as an intern in flutter development role.

Education

A 4th year Software engineering student at Jimma university
